Statistics for alan-turing-institute/autoemulate

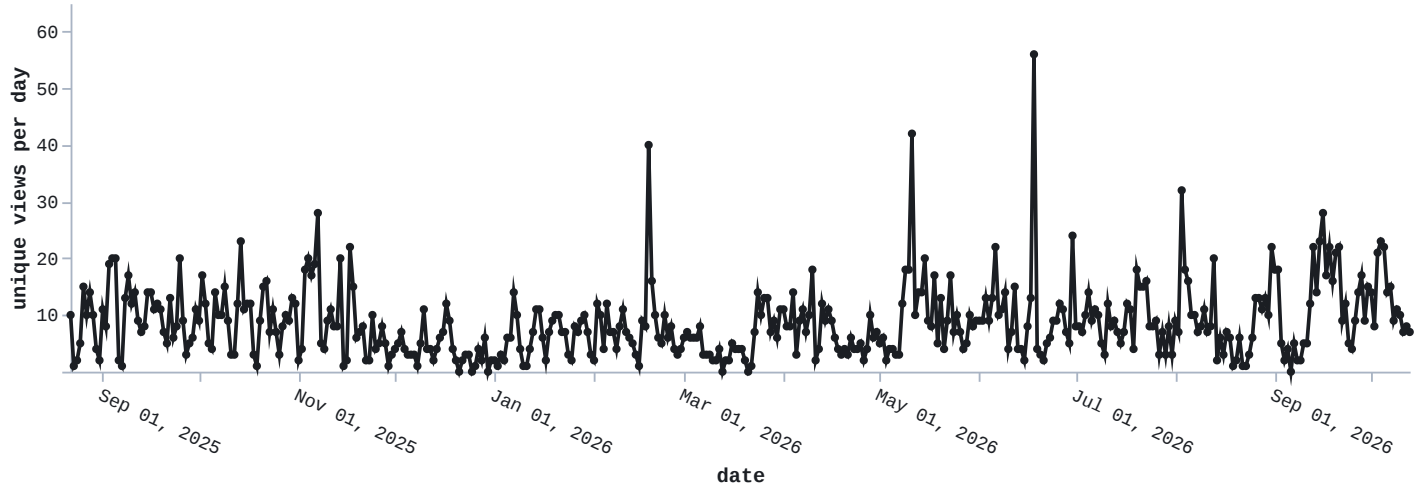

Generated for alan-turing-institute/autoemulate with jgehrcke/github-repo-stats at 2026-10-14 23:07 UTC.

Table of contents:

- Views
- Clones
- Stargazers
- Forks
- Top referrers and paths

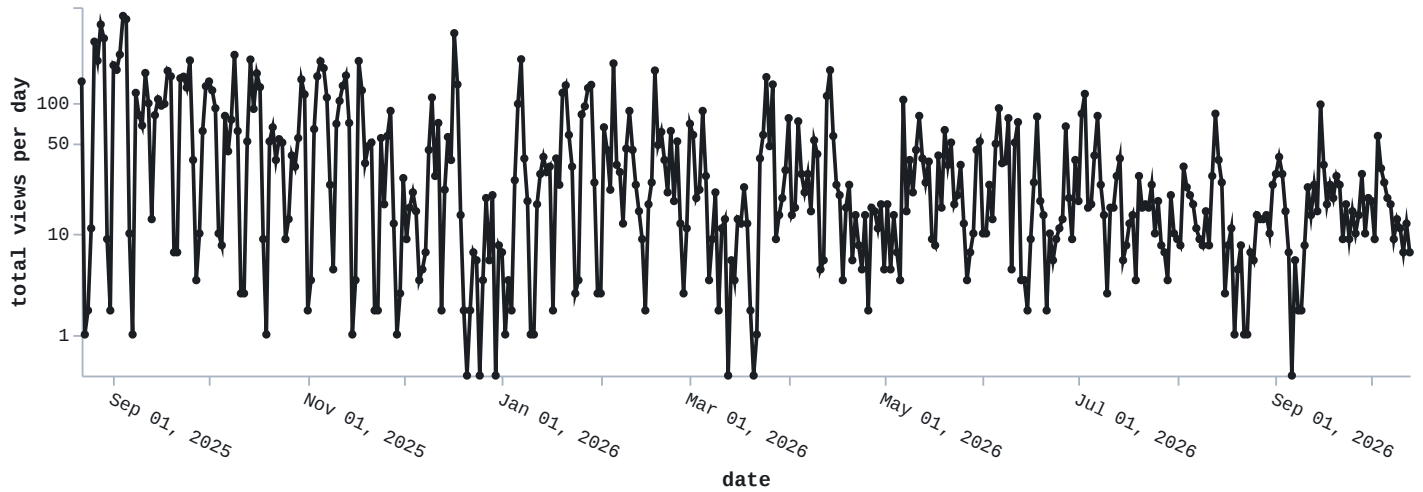

Views

Unique visitors

Cumulative: 3618

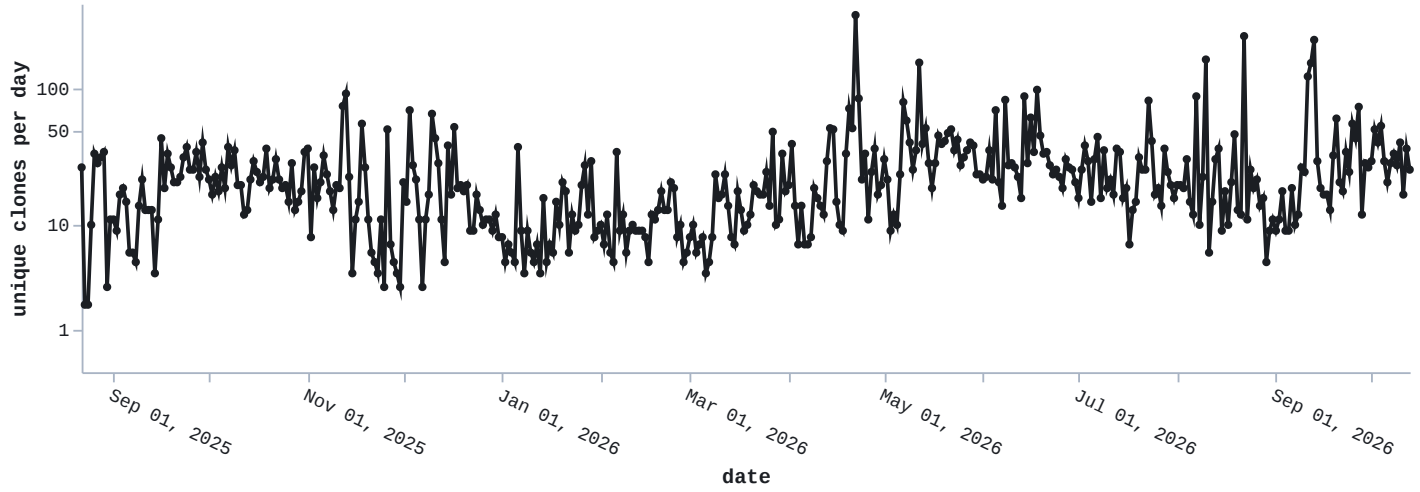

Total views

Cumulative: 18142

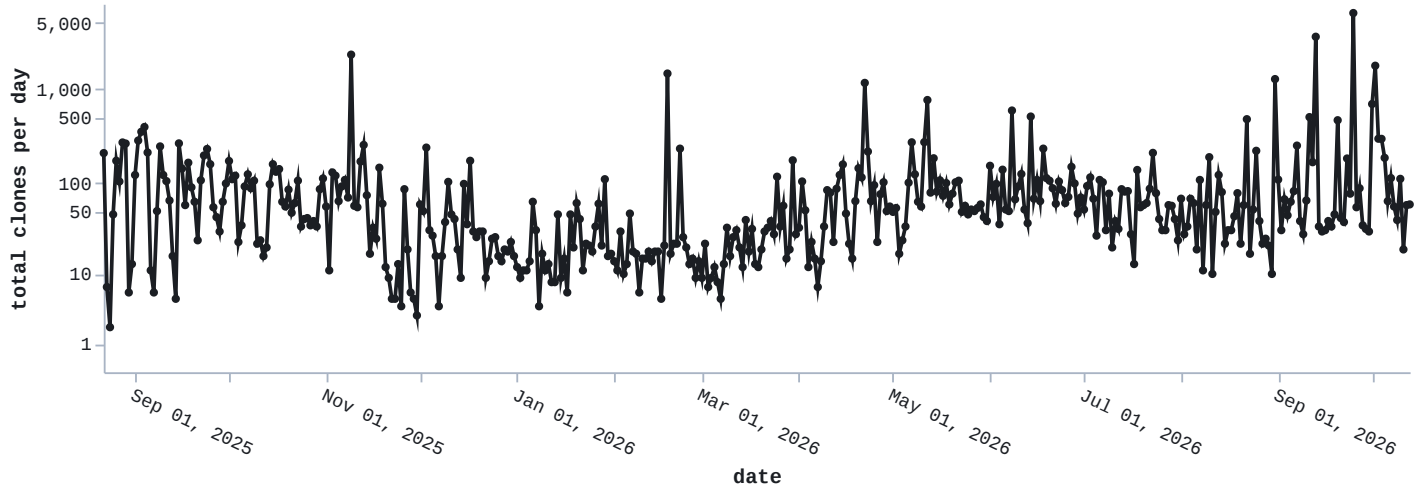

Clones

Unique cloners

Cumulative: 10698

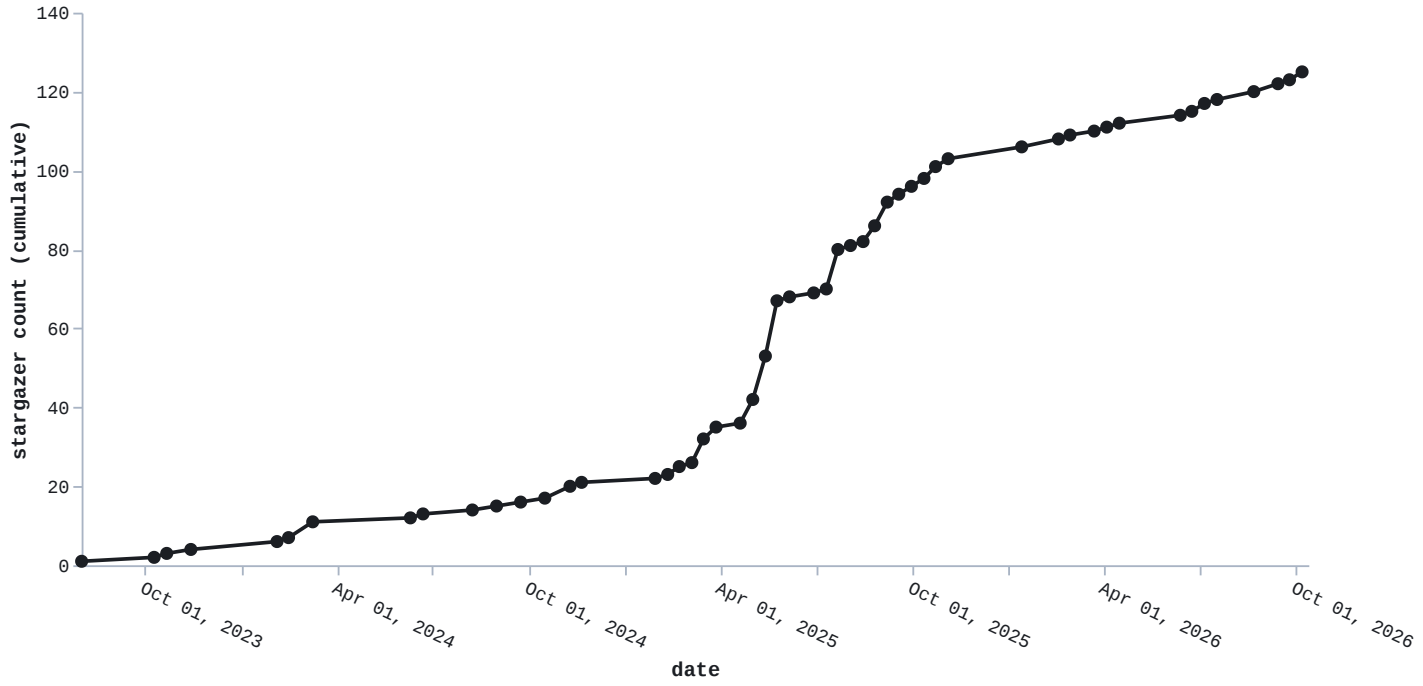

Total clones

Cumulative: 48171

Stargazers

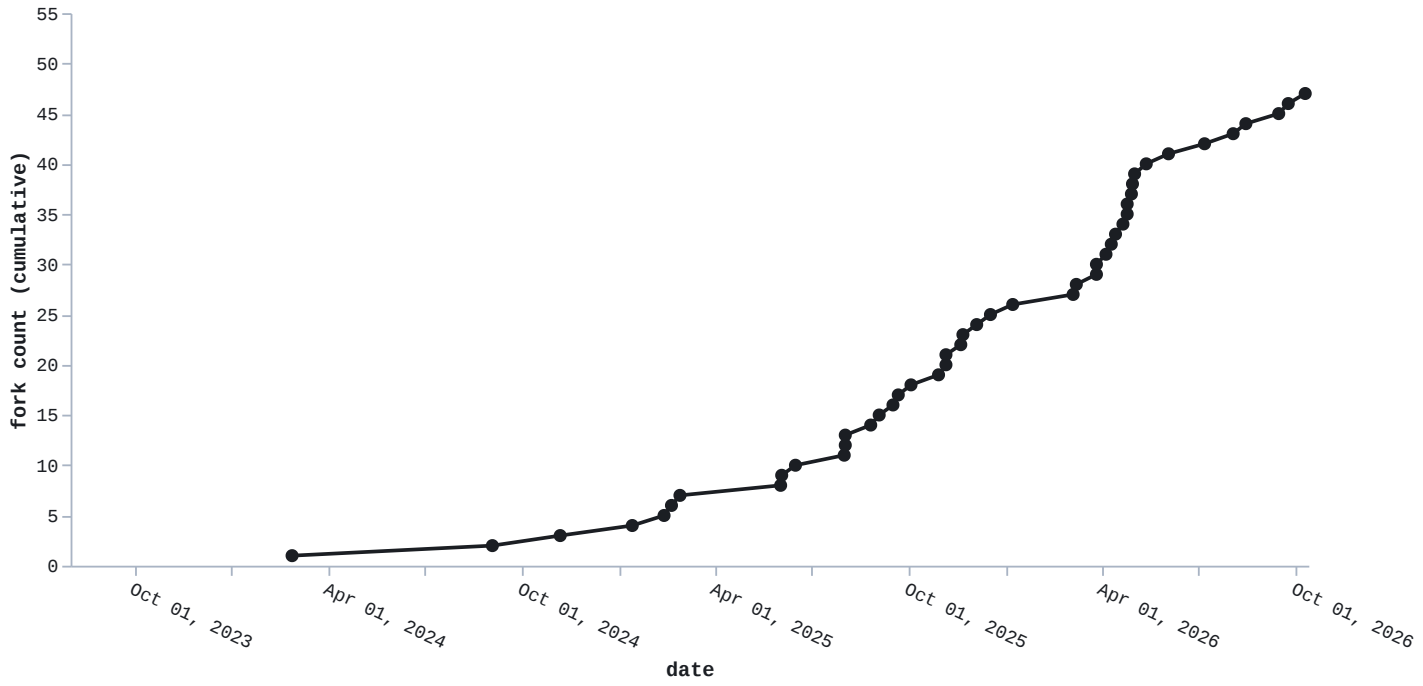

Each data point corresponds to at least one stargazer event. The time resolution is one day.

Note: this plot shows a larger time frame than the view/clone plots above because the star/fork data contains earlier samples.

Forks

Each data point corresponds to at least one fork event. The time resolution is one day.

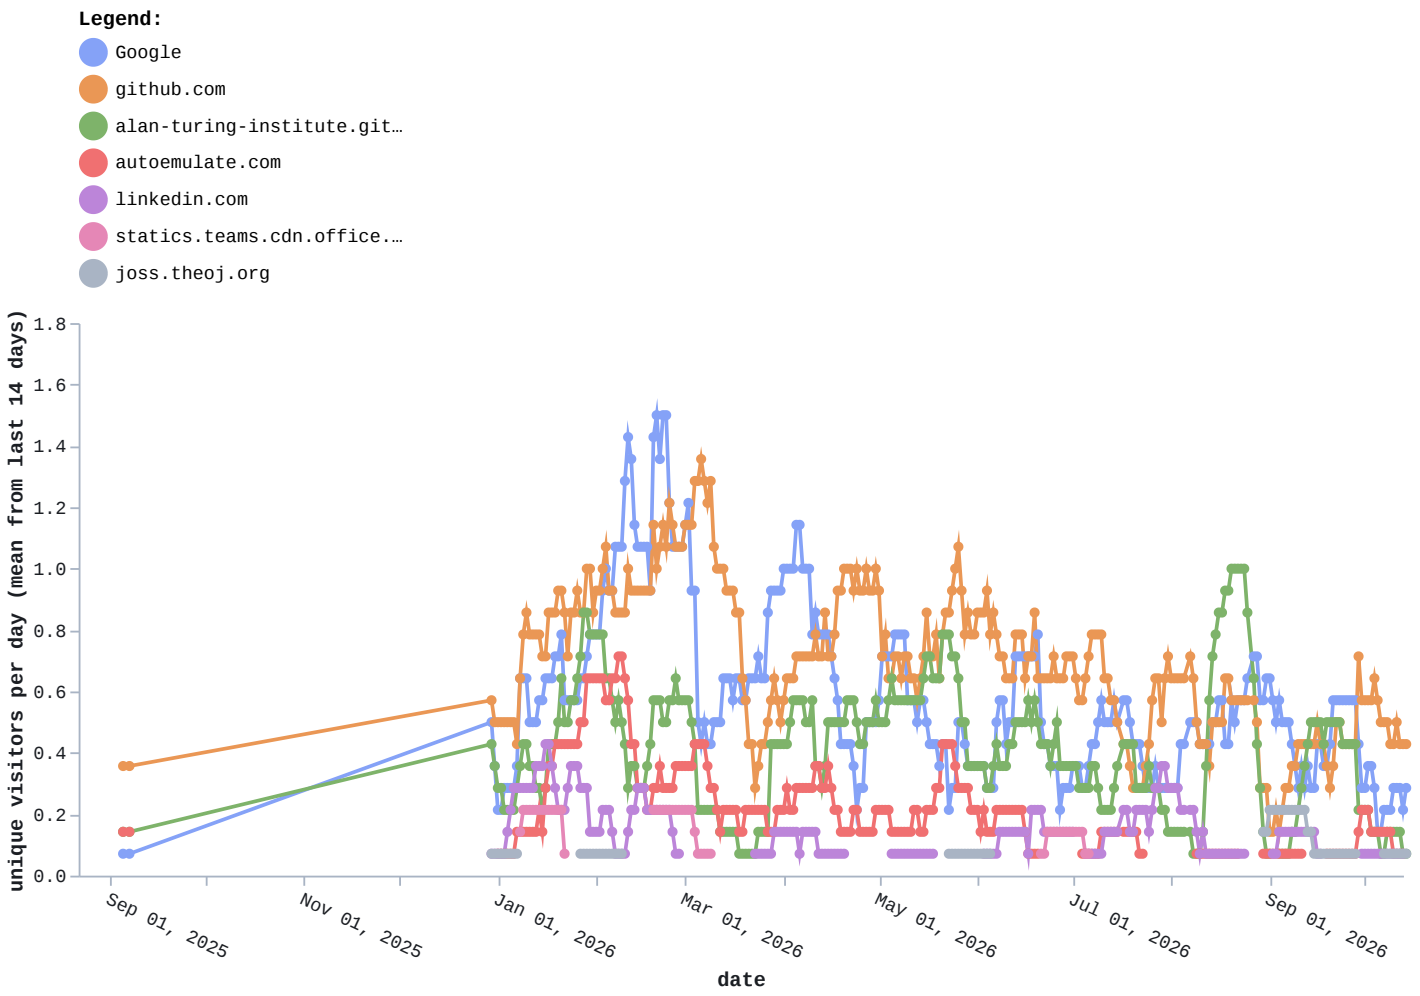

Note: this plot shows a larger time frame than the view/clone plots above because the star/fork data contains earlier samples.

Top referrers and paths

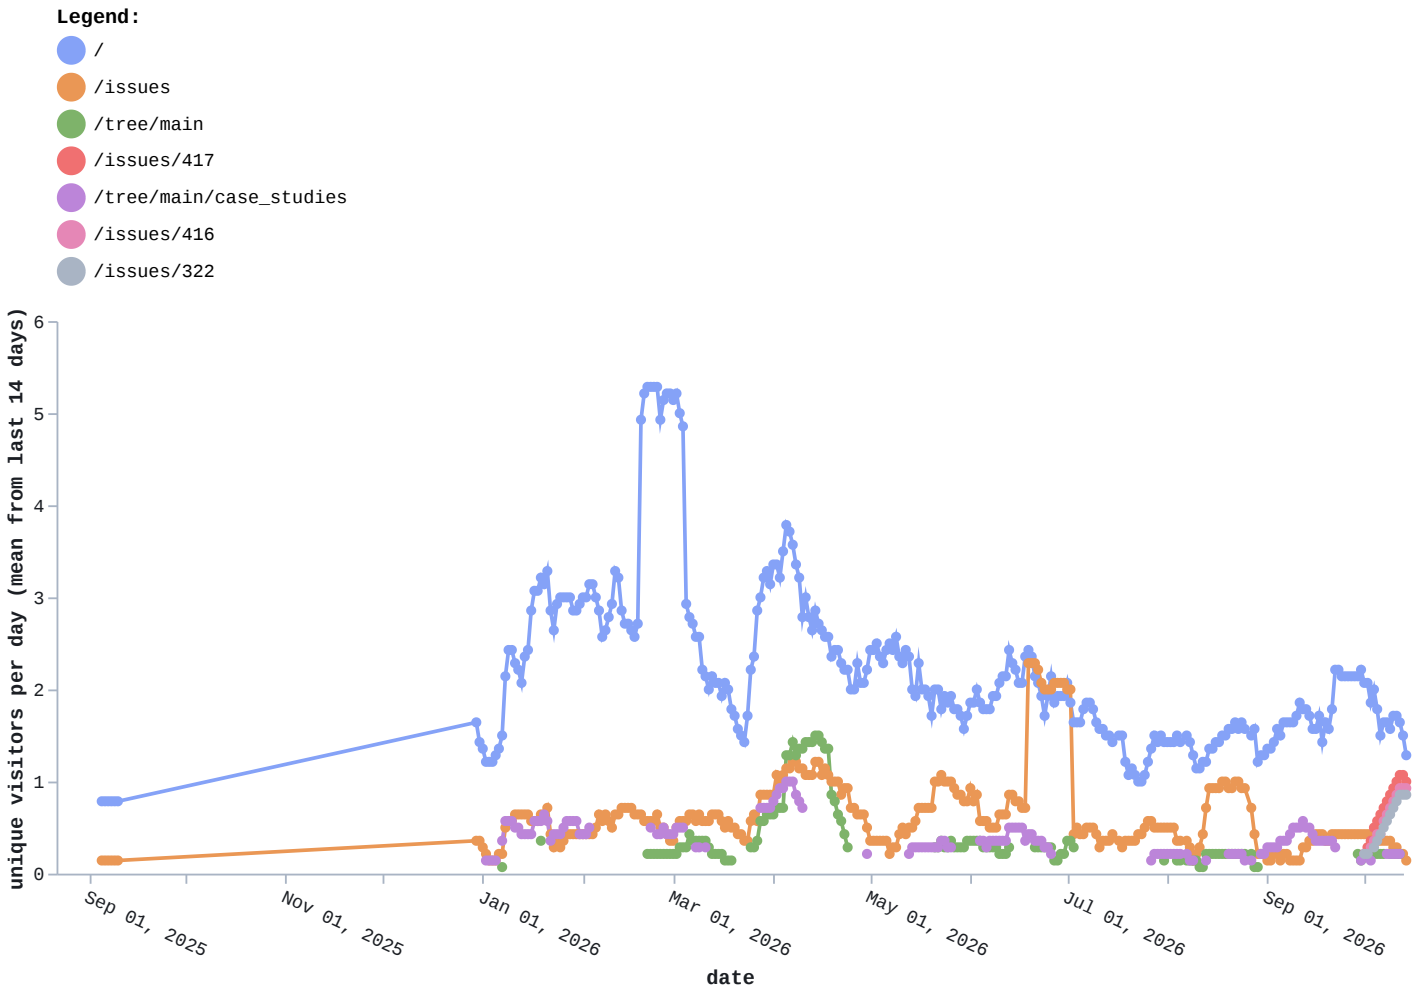

Note: Each data point in the plots shown below is influenced by the 14 days leading up to it. Each data point is the arithmetic mean of the “unique visitors per day” metric, built from a time window of 14 days width, and plotted at the right edge of that very time window. That is, these plots respond slowly to change (narrow peaks are smoothed out).

Top referrers

Top 15 referrers: 01: `Google` , 02: `github.com` , 03: `alan-turing-institute.github.io` , 04: `autoemulate.com` , 05: `linkedin.com` , 06: `statics.teams.cdn.office.net` , 07: `joss.theoj.org` , 08: `goodfirstissues.com` , 09: `chatgpt.com` , 10: `search.brave.com` , 11: `mail.qq.com` , 12: `notebooks.githubusercontent.com` , 13: `overleaf.com` , 14: `deref-mail.com` , 15: `perplexity.ai`
